

POSITION ANNOUNCEMENT—SUSTAINABILITY CONSULTANT

Re:Vision Architecture, a deep green architecture and sustainability consulting practice located in the Manayunk neighborhood of Philadelphia, is looking for an experienced Sustainability Specialist to guide clients (typically building owners, facility managers, or design teams) through strategic and low-stress LEED certifications and other related green building improvements and/or sustainable development plans. It is anticipated that 80% to 90% of this person's project-related time will be devoted to managing LEED certifications for a variety of clients, with the balance of project time devoted to related sustainability projects TBD by the specific background and skills of the successful candidate. Such projects may include: Living Building Challenge feasibility studies, master plans for sustainability facilities, comparative analyses of sustainability options, sustainability charrettes, etc. Candidates with engineering backgrounds and/or energy modeling expertise will be highly competitive.

The kind of person we are looking for will ideally:

- have a demonstrated commitment to and passion for sustainable design and development through education, career choices, and/or volunteer work;
- have a solid background in building design, engineering, construction, and/or operations;
- be a LEED AP with practical experience in securing successful certifications. The ability to successfully navigate diverse project types—new construction, core & shell, corporate interiors, and, particularly, existing building operations and maintenance is a big plus.
- be a skilled project and process manager—keeping track of a high volume of detailed information, schedules, etc, as well as creatively motivating and inspiring others to meet deadlines and provide needed information;
- be detail-oriented and highly organized;
- enjoy and be skilled at the teaching, coaching, and customer-service aspects of consulting work;
- be curious by nature and interested in finding new ways doing things—both for clients and for Re:Vision;
- understand how to creatively effect positive change within typical business constraints faced by many Re:Vision clients—tight schedules, limited budgets, litigation concerns, and/or existing corporate standards and ways of doing things;
- **have related bonus skills that bring added value to the above work—such as energy modeling, LCA analysis, indoor air quality testing—you tell us...**
- be a generally positive and good-natured person and colleague.

Likely start date in early to mid-Summer.

Interested candidates should send a resume along with any preliminary questions to Jobs@ReVisionArch.com. Please indicate how you learned of the position.

All inquiries will remain confidential.

MORE ABOUT RE:VISION

Re:Vision Architecture is a deep green architecture and sustainability consulting practice that was founded in 2001 to re-vision and restore the balance between natural and built environments. With buildings consuming 40% of the land, water, energy, and raw materials used globally, development presents the single largest opportunity for changing the sustainability equation. For this reason, Re:Vision specializes exclusively in green building projects, from design through operations.

Re:Vision is a mission-driven professional corporation, with a home office in Philadelphia, PA and a satellite office in Berkeley, CA, that serve a national clientele and share emerging best practices from both coasts. As a company, Re:Vision is a founding B-Corporation that has demonstrated comprehensive and transparent social, environmental, and employment performance standards. Named "Best Green Architect 2009" by Philadelphia Magazine, Re:Vision has been recognized as a leader in sustainable design by numerous organizations such as the Pennsylvania Environmental Council, the Pennsylvania Resources Council, the National Association of Industrial and Office Properties, the Society of American Registered Architects, the Association of Building Contractors, the Philadelphia Chapter of the American Institute of Architects, the Sustainable Business Network, and the Cascadia Green Building Council. As an early adopter of sustainable design, Re:Vision has an extensive portfolio of completed work that represents the following key services:

- Architectural design for projects that range from common sense green to cutting-edge sustainable design
- LEED/sustainability technical consulting & management for designers, contractors, & owners
- Green behavior change projects targeting building users
- Green operations and maintenance implementation
- Sustainability research and policy development
- Professional community engagement and integrated design charrettes
- Sustainability-related education
- Fundraising for green buildings
- Indoor air quality testing

Behind the projects and the firm, Re:Vision is comprised of friendly people that are passionate about sustainability and community. We have an excellent employee-retention track record and support a healthy work-life balance.
